

Zinc-plated Screws

Self-Drilling: a self-tapping hex head screw with a spade-shaped point designed to drill its own hole. This fastener is used in metal to metal applications.

Self-Drilling Screws

type	sizes	lengths	finish	head type
self-drilling	#6	3/8 thru 1 1/4	zinc-plated	1/4 hex head
self-drilling	#8	1/2" thru 3"	zinc-plated	1/4 hex head
self-drilling	#10	1/2" thru 3"	zinc-plated	5/16 hex head
self drilling	#10	3/4"	zinc plated	5/16 high hex head
self drilling	#12	3/4" thru 4"	zinc plated	5/16 hex head
self drilling	#14	3/4" thru 8"	zinc plated	5/16 & 3/8 hex head

For use in HVAC, electrical, and sheetmetal applications
